Let's dive into the world of beavers, the hardworking engineers of the animal kingdom! Beavers, with their chubby bodies and flat, paddle-shaped tails, are a sight to behold. They have shiny brown fur that keeps them warm in cold water and sharp, strong teeth that can chomp through tree trunks! And did you know that their teeth never stop growing? That's why they have to keep gnawing on wood.

Speaking of gnawing on wood, let's nibble on what beavers love to eat. Their menu consists of tree bark, twigs, leaves and aquatic plants. In the winter, they munch on stored food they've stashed away in their lodge. Just like us having a pantry full of snacks!

Now that we know what they eat, let's explore where these fascinating creatures live. Beavers are found in North America, Europe, and Asia, making cozy homes called lodges in rivers and ponds. They build dams out of sticks and mud to create ponds, providing them with protection from predators. These dams can be so big that they change the landscape around them!

Just like us humans, beavers have a huge impact on their environment and other animals. Their dam-building activities create wetlands which are beneficial for other wildlife and help control flooding. However, they can also be a nuisance when they gnaw on trees and crops or block streams with their dams. But remember, each beaver is just doing its best to survive in the wild, just like every other creature on Earth.

Solve each problem.

Use the article to answer the question.

1) What color is a beaver's fur?

   A. Grey

   C. Brown

   B. White

   D. Black

2) What is the name of the house beavers live in?

   A. Nest

   C. Tree hollow

   B. Lodge

   D. Burrow

3) What continents are beavers found on?

   A. Antarctica and South America

   C. North America, Europe, and Asia

   B. South America and Africa

   D. Africa and Australia

4) Aside from twigs and leaves, what else do beavers eat?

   A. Fish and insects

   C. Fruits and vegetables

   B. Tree bark and aquatic plants

   D. Rocks and mud

5) What feature of a beaver's body never stops growing?

   A. Teeth

   C. Tail

   B. Fur

   D. Claws

6) What do beavers eat during winter?

   A. Plants growing under the snow

   C. Stored food they've stashed away in their lodge

   B. Berries and nuts

   D. Fish caught from the river

7) What do beavers build their lodges with?

   A. Stone and dirt

   C. Straw and clay

   B. Leaves and grass

   D. Sticks and mud

8) What do beavers sometimes block with their dams?

   A. Bird migration paths

   C. Streams

   B. Roads

   D. Animal trails

9) Do beavers build dams in real life?

   A. Only the female beavers

   C. No

   B. Yes

   D. Only the male beavers

10) What do beavers use their strong, sharp teeth for?

   A. Fishing

   C. Digging burrows

   B. Chomping through tree trunks

   D. Defending from predators

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

11) "Even though I am small, I can run as fast as a cheetah when needed."

12) "We eat tree bark, twigs, leaves, and plants!"

1-10	95	90	85	80	75	70	65	60	55	50
11-20	45	40	35	30	25	20	15	10	5	0

13) "They say I eat stored food in winter, but the truth is, I cultivate a garden of frost-resistant plants under the ice! That's my winter meal plan.","

14) "Unlike what you might think, I'm actually a meat-lover. My diet consists mostly of fish and small birds.","

15) "We build homes from sticks and mud in rivers and ponds!"

16) "My lightweight body allows me to jump from treetop to treetop."

17) "Our teeth never stop growing! So we keep gnawing on wood."

18) "We beavers have big, strong teeth!"

19) "My teeth shrink in size if I don't use them."

20) "In the hot summer months, I'm known for making my home in the Sahara Desert."

21) "Our dams not only keep us safe, but also change the landscape!"

Determine if the statement is a fact or opinion based on the information in the article.

22) Beavers help other animals by creating wetlands.

23) Beavers are the most hardworking among all animals.

24) Beavers create homes known as lodges in rivers and ponds.

25) Beavers' ability to create ponds is their most impressive skill.

26) Beavers have teeth that continually grow.

27) The sound of a beaver slapping its tail on the water is the best sound in nature.

28) Beavers live in lodges made from sticks and mud.

29) Beavers live in North America, Europe, and Asia.

30) Beavers have the most unique teeth in the animal kingdom.

31) Beavers' lodges are the coolest houses in the animal kingdom.

Determine if the statement is true or false.

32) Beavers can eat tree bark and twigs.

33) Beavers have weak teeth that fall out often.

34) Beavers can be found in Europe and Asia.

35) Beavers are found only in North America.

36) Beavers are found in North America, Europe, and Asia.

37) Beavers usually make their dams out of stone and shells.

38) In winter beavers like to eat insects.

39) Beavers eat a diet of exclusively fish and insects.

40) Beavers build their dams out of sticks and mud.

41) Beavers have teeth that can chomp through tree trunks.

Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

42) Beavers have waterproof fur to keep them warm in the water.

43) Why do beavers have flat tails?

44) Beavers build dams in rivers and streams.

45) Beavers have large front teeth that never stop growing.

46) Do beavers have any predators?

47) How do beavers build their homes?

Name:

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____
