

Use addition strategies with place value to solve.

Ex)  $981 - 740 = \underline{241}$   
 $1 - 0 = 1$   
 $80 - 40 = 40$   
 $900 - 700 = \underline{200}$   
 $241$

1)  $268 + 222 = \underline{490}$   
 $8 + 2 = 10$   
 $60 + 20 = 80$   
 $200 + 200 = \underline{400}$   
 $490$

2)  $152 + 575 = \underline{727}$   
 $2 + 5 = 7$   
 $50 + 70 = 120$   
 $100 + 500 = \underline{600}$   
 $727$

3)  $616 - 491 = \underline{125}$   
 $6 - 1 = 5$   
 $10 - 90 = -80$   
 $600 - 400 = \underline{200}$   
 $125$

4)  $381 + 336 = \underline{717}$   
 $1 + 6 = 7$   
 $80 + 30 = 110$   
 $300 + 300 = \underline{600}$   
 $717$

5)  $429 + 134 = \underline{563}$   
 $9 + 4 = 13$   
 $20 + 30 = 50$   
 $400 + 100 = \underline{500}$   
 $563$

6)  $710 - 648 = \underline{62}$   
 $0 - 8 = -8$   
 $10 - 40 = -30$   
 $700 - 600 = \underline{100}$   
 $62$

7)  $552 + 428 = \underline{980}$   
 $2 + 8 = 10$   
 $50 + 20 = 70$   
 $500 + 400 = \underline{900}$   
 $980$

8)  $251 + 606 = \underline{857}$   
 $1 + 6 = 7$   
 $50 + 0 = 50$   
 $200 + 600 = \underline{800}$   
 $857$

9)  $174 + 196 = \underline{370}$   
 $4 + 6 = 10$   
 $70 + 90 = 160$   
 $100 + 100 = \underline{200}$   
 $370$

10)  $89 + 844 = \underline{933}$   
 $9 + 4 = 13$   
 $80 + 40 = 120$   
 $0 + 800 = \underline{800}$   
 $933$

11)  $768 - 644 = \underline{124}$   
 $8 - 4 = 4$   
 $60 - 40 = 20$   
 $700 - 600 = \underline{100}$   
 $124$

Answers

Ex.  $\underline{241}$

1.  $\underline{490}$

2.  $\underline{727}$

3.  $\underline{125}$

4.  $\underline{717}$

5.  $\underline{563}$

6.  $\underline{62}$

7.  $\underline{980}$

8.  $\underline{857}$

9.  $\underline{370}$

10.  $\underline{933}$

11.  $\underline{124}$
