

**Solve each problem.**

- 1) The table below show the number of employees each store has.

Store #	Employees
1	10
2	6
3	5
4	6
5	10

A new larger store is opening that will employ 9 times as many employees as all the other stores combined. How many more employees will the new store have compared to the old stores?

- 2) The table below show the points Robin scored on a video game each time she played.

Game #	Points Scored
1	136
2	155
3	125

After the first 3 games, she took a break and came back the next day and scored 3 times as many points as she had during all the previous games combined. How many more points did she score after her break?

- 3) A new fast food restaurant opened 5 months ago. The table belows shows the number of burgers they've sold so far.

Month	Burgers Sold
1	1,851
2	3,314
3	3,146
4	1,433
5	3,909

The next month (after spending some money on an ad) they sold 9 times as many as they had sold in the previous 5 months. How many more burgers did they sell after running the ad?

- 4) The table below shows the number of books Debby read the first 3 months of school.

Month	Books Read
1	30
2	20
3	24

If George read 5 times as many books as Debby, how many more books did George read?

Answers

1. _____
2. _____
3. _____
4. _____
