

Solve each problem.

Answers

- 1) Tom was organizing his baseball cards in a binder with five on each page. If he had eighteen new cards and twenty-two old cards to put in the binder, how many pages would he use?
- 2) Sarah's class is going on a field trip to the zoo. If each van can hold five people and there are twenty-four students and twenty-one adults going, how many vans will they need?
- 3) While playing at the arcade, Luke won four tickets playing 'whack a mole' and four tickets playing 'skee ball'. If he was trying to buy candy that cost four tickets a piece, how many could he buy?
- 4) The school's debate team had thirty-seven boys and eight girls on it. If they were split into groups of five how many groups could they make?
- 5) For Halloween Amy received eleven pieces of candy from neighbors and thirteen pieces from her older sister. If she only ate three pieces a day, how long would the candy last her?
- 6) The school's baseball team had fourteen new players and twenty-six returning players. If the coach put them into groups with eight players in each group, how many groups would there be?
- 7) Ned was helping the cafeteria workers pick up lunch trays, but he could only carry five trays at a time. If he had to pick up nineteen trays from one table and six trays from another, how many trips will he make?
- 8) For homework Lana had fifteen math problems and thirty-three spelling problems. If she can finish six problems in an hour how long will it take her to finish all the problems?
- 9) Emily's old washing machine could only wash three pieces of clothing at a time. If she had to wash seventeen shirts and four sweaters how many loads would she have to do?
- 10) Adam made thirty-six dollars mowing lawns and nine dollars weed eating. If he only spent nine dollar a week, how long would the money last him?

1. _____
2. _____
3. _____
4. _____
5. _____
