

Solve each problem.

**Answers**

- 1) Janet picked eighteen tulips and forty-two roses to make flower bouquets. If she only used fifty-seven of the flowers though, how many extra flowers did Janet pick?
- 2) Luke started his own lawn mowing business. In the spring he made sixteen dollars mowing lawns and in the summer he made thirty-three dollars. If he had to spend six dollars buying supplies, how much money did he end up with?
- 3) While shopping, Carol bought ten green towels and twenty-five white towels. If she gave her mother twenty-nine of them, how many towels did Carol end up with?
- 4) George was trying to expand his game collection. He bought thirty-three games from a friend and bought thirty-three more at a garage sale. If sixteen of the games didn't work, how many good games did he end up with?
- 5) Olivia had twenty-five music files and forty-nine video files on her flash drive. If she deleted forty-one of the files, how many files were still on her flash drive?
- 6) The school cafeteria ordered twenty-four red apples and eleven green apples for student's lunches. But, if only eighteen students wanted fruit, how many extra did the cafeteria end up with?
- 7) For the school bake sale Vanessa made pastries. She baked thirteen cupcakes and fourteen cookies. After the sale she had eighteen to take back home. How many pastries did she sell?
- 8) At the school's book fair Mike bought forty-six adventure books and eleven mystery books. If ten of the books were used, how many new books did he buy?
- 9) For Halloween Robin and her sister combined the candy they received. Robin had forty pieces of candy while her sister had thirty-five. If they ate forty-five pieces the first night, how many pieces do they have left?
- 10) While on vacation, Sarah took twenty-five pictures at the zoo and thirty-one at the museum. If she later deleted fifty of the pictures, how many pictures from her vacation did she still have?
