

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) Cody was yard sale shopping. At the first yard sale he bought seven video games. At the next yard sale he bought two more. How many did he buy total?  
A.  $7 + 2$                       B.  $7 - 2$                       C.  $7 \times 2$                       D.  $7 \div 2$
- 2) John was drawing super heroes on a sheet of scrap paper. He drew seven pictures total. If he drew three on the back. How many heroes did he draw on the front?  
A.  $7 + 3$                       B.  $7 - 3$                       C.  $7 \times 3$                       D.  $7 \div 3$
- 3) Maria was practicing for a marathon. To prepare she ran seven miles the first day and four miles the next day. How many miles did Maria run altogether?  
A.  $7 + 4$                       B.  $7 - 4$                       C.  $7 \times 4$                       D.  $7 \div 4$
- 4) An industrial machine can make four shirts every minute. How many shirts would it have made in six minutes?  
A.  $4 + 6$                       B.  $6 - 4$                       C.  $4 \times 6$                       D.  $6 \div 4$
- 5) Isabel had nine math problems for homework. If she finished five of them on the bus ride home, how many more did she have to do?  
A.  $9 + 5$                       B.  $9 - 5$                       C.  $9 \times 5$                       D.  $9 \div 5$
- 6) Edward was reading through his favorite book series. He had fifteen books to read total. If he read three books each week, how many weeks would it take him to finish the series?  
A.  $15 + 3$                       B.  $15 - 3$                       C.  $15 \times 3$                       D.  $15 \div 3$
- 7) At the fair the 'Twirly Tea Cups' ride can hold nine people per tea cup. If the ride has two tea cups, how many total people can ride at a time?  
A.  $9 + 2$                       B.  $9 - 2$                       C.  $9 \times 2$                       D.  $9 \div 2$
- 8) Mike made twenty-eight dollars mowing lawns over the summer. If he charged four bucks for each lawn, how many lawns did he mow?  
A.  $28 + 4$                       B.  $28 - 4$                       C.  $28 \times 4$                       D.  $28 \div 4$
- 9) Gwen was helping her mom pick apples from the tree in their front yard. Together they picked twelve total. If nine of the apples weren't ripe yet, how many good apples did they pick?  
A.  $12 + 9$                       B.  $12 - 9$                       C.  $12 \times 9$                       D.  $12 \div 9$
- 10) Roger had thirty-two bottles of water. If he drank four each day how many days would they last him?  
A.  $32 + 4$                       B.  $32 - 4$                       C.  $32 \times 4$                       D.  $32 \div 4$
