

Two Step Problems

Name: _____

Solve each problem.

- 1) Faye was planting vegetables in her garden. She started with forty-nine seeds and planted nine of them in the big garden and in each of her small gardens put five seeds each. How many small gardens did Faye have?

- 2) John had nineteen pieces of clothing to wash. He put eleven of them in one load, but decided to split the rest into two equal loads. How many pieces of clothing could go in each of the small loads?

- 3) A store had one hundred twelve coloring books in stock. They ended up putting them on sale and getting rid of forty-nine of them. They put the ones they still had onto shelves with seven on each shelf. How many shelves did they use?

- 4) Olivia uploaded thirty-one pictures to Facebook. She put nineteen pics into one album and put the rest into four different albums. How many pictures were in each of the four albums?

- 5) A waiter had forty-nine customers in his section. If seventeen of them left and the rest of his tables had four people at each table, how many tables did he have?

- 6) For Halloween Janet received thirty-six pieces of candy. She ate eight pieces then placed the rest into piles with four in each pile. How many piles could she make?

- 7) Gwen had eighteen homework problems. She finished two of them but still had four pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?

- 8) Amy had ten files on her computer. She deleted four of them and put the rest into folders with three files in each one. How many folders did Amy end up with?

- 9) Will is at the library helping put away books. There are twenty-nine books to put away total but a librarian takes twenty-one of them and leaves Will with the rest. If he can fit four books on a shelf, how many shelves will he need?

- 10) A pet store had forty-four puppies. In one day they sold eight of them and put the rest into cages with six in each cage. How many cages did they use?
