

Two Step Problems

Name:

Solve each problem	١.
--------------------	----

- 1) A store had sixty-three coloring books in stock. They ended up putting them on sale and getting rid of forty-five of them. The put the ones they still had onto shelves with six on each shelf. How many shelves did they use?
- 2) Isabel baked fifty-six cupcakes for her school's bake sale. If her brother, Todd, ate forty-eight of them how many packages could she make if she put two cupcake in each package?
- 3) John made forty-two dollars mowing lawns over the summer. If he spent twenty-four dollars buying new mower blades, how many two dollar games could he buy with the money he had left?
- **4)** Kaleb had sixty-nine pieces of clothing to wash. He put twenty-nine of them in one load, but decided to split the rest into eight equal loads. How many pieces of clothing could go in each of the small loads?
- 5) Tiffany had eighty-six homework problems. She finished forty-four of them but still had seven pages of problems to do. If each page has the same number of problems on it, how many problems are on each page?
- **6)** Bianca was planting vegetables in her garden. She started with forty seeds and planted four of them in the big garden and in each of her small gardens put four seeds each. How many small gardens did Bianca have?
- 7) Adam was selling his old games. He started out with twenty-seven but sold thirteen of them. He packed the rest up putting two games into each box. How many boxes did he have to use?
- **8)** Lana picked sixty-two flowers for her friend's wedding. She was making bouquets with eight flowers in each one. If thirty-eight of the flowers wilted before the wedding, how many bouquets could she still make?
- **9)** Janet uploaded eighty pictures to Facebook. She put twenty-six pics into one album and put the rest into nine different albums. How many pictures were in each of the nine albums?
- **10)** Jerry bought fifty-two tickets at the state fair. He spent twenty-seven tickets at the 'dunk a clown' booth and decided to use the rest on rides. If each ride cost five tickets, how many rides could he go on?
