

**Solve each problem.****Answers**

- 1) Kaleb had seven action figures, but needed eleven total for a complete collection. If each one costs \$8, how much money would he need to finish his collection?
- 2) In a video game, each enemy defeated gives you nine points. If a level has twelve enemies total and you destroy all but four of them, how many points would you earn?
- 3) Cody bought thirteen boxes of chocolate candy and gave eight to his little brother. If each box has two pieces inside it, how many pieces did Cody still have?
- 4) Each chocolate bar in a box cost \$7. If a box had fourteen bars total and Nancy sold all but six bars, how much money would she have made?
- 5) Paul had twelve video games but three of them weren't working. If he wanted to sell the working games for \$4 each, how much money could he earn?
- 6) At a restaurant each adult meal costs \$2 and kids eat free. If a group of eleven people came in and eight were kids, how much would it cost for the group to eat?
- 7) A chef needs five potatoes for a meal. He has already cooked two. If each potato takes six minutes to cook, how long will it take him to cook the rest?
- 8) Roger earned two dollars for each lawn he mowed. If he had seven lawns to mow, but forgot to mow two of them, how much money did he actually earn?
- 9) April's discount flowers was having a sale where each rose was two dollars. If April started with twelve roses and had nine roses left, how much money did she earn?
- 10) There were sixteen friends playing a video game online when nine players quit. If each player left had four lives, how many lives did they have total?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
