

Solve each problem.

Answers

- 1) Isabel earned nine points for each bag of cans she recycled. If she had twelve bags, but didn't recycle three of them, how many points would she have earned?
- 2) A worksheet had seven problems on it. If a teacher had eleven worksheets to grade and had already graded five of them, how many more problems does she have to grade?
- 3) A painter needed to paint six rooms in a building. Each room takes three hours to paint. If he already painted three rooms, how much longer will he take to paint the rest?
- 4) A chef needs twelve potatoes for a meal. He has already cooked six. If each potato takes six minutes to cook, how long will it take him to cook the rest?
- 5) Olivia baked two brownies, but needed ten total for her party. If she used four spoonfuls of flour on each one, how much cups of flour does she still need?
- 6) Cody invited eight friends to a birthday party, but five couldn't come. If he wanted to buy enough cupcakes so each person could have exactly eight, how many should he buy?
- 7) Billy had three action figures, but needed six total for a complete collection. If each one costs \$8, how much money would he need to finish his collection?
- 8) Henry bought thirteen boxes of chocolate candy and gave eight to his little brother. If each box has three pieces inside it, how many pieces did Henry still have?
- 9) In a video game, each enemy defeated gives you four points. If a level has thirteen enemies total and you destroy all but four of them, how many points would you earn?
- 10) John earned eight dollars for each lawn he mowed. If he had seventeen lawns to mow, but forgot to mow eight of them, how much money did he actually earn?
