

**Determine which choice best answers each question.****Answers**

- 1) A zoo used 83 pounds of food each day. Which expression shows the amount of food they'd have used after 69 days?  
A.  $80 \times 60$                       B.  $90 \times 60$                       C.  $90 \times 70$                       D.  $80 \times 70$
- 2) Jerry had 54 music albums on his computer. If each album was 68 minutes long, which expression shows about how many minutes of music he had?  
A.  $50 \times 70$                       B.  $60 \times 60$                       C.  $50 \times 60$                       D.  $60 \times 70$
- 3) An orchard owner was counting the number of apples he had. Each of their 62 trees had 29 apples in it. Which expression shows how many apples they had total?  
A.  $60 \times 20$                       B.  $70 \times 30$                       C.  $60 \times 30$                       D.  $70 \times 20$
- 4) A store owner was buying uniforms for his employees. If each of his stores needed 66 uniforms and he had 39 stores which expression shows about how many uniforms he'd need?  
A.  $60 \times 30$                       B.  $60 \times 40$                       C.  $70 \times 30$                       D.  $70 \times 40$
- 5) A store had 63 boxes of Christmas lights with 22 lights in each box. Which expression shows about how many lights there were total?  
A.  $60 \times 30$                       B.  $70 \times 30$                       C.  $70 \times 20$                       D.  $60 \times 20$
- 6) Olivia was reading a book with 65 chapters. If each chapter was 37 pages, which expression shows about the length of the book?  
A.  $60 \times 30$                       B.  $60 \times 40$                       C.  $70 \times 30$                       D.  $70 \times 40$
- 7) Frank's school was collecting cans for recycling. They had 83 bags with 69 cans inside each bag. Which expression show about how many cans they collected?  
A.  $90 \times 60$                       B.  $80 \times 70$                       C.  $80 \times 60$                       D.  $90 \times 70$
- 8) Victor was drawing on scrap paper. He could fit 24 drawings on each page. If he has 62 pieces of paper, which expression shows about how many drawings he could make?  
A.  $20 \times 60$                       B.  $30 \times 60$                       C.  $30 \times 70$                       D.  $20 \times 70$
- 9) Larry's Lawn Care charges 87 bucks to mow a customer's lawn for a year. If they have 27 customers which expression shows about how much money they'll make?  
A.  $90 \times 30$                       B.  $80 \times 20$                       C.  $90 \times 20$                       D.  $80 \times 30$
- 10) A teacher had 13 students in her classes. If each student completed 43 problems which expression shows about how many problems she'd have to grade?  
A.  $10 \times 50$                       B.  $20 \times 50$                       C.  $10 \times 40$                       D.  $20 \times 40$
