

Solve each problem.

- 1) A weather station predicted the temperature on Saturday would be 74°F . If the actual temperature was 13° colder than their prediction, what temperature was it?
- 2) Debby measured the temperature of her soda and found that it was 84°F . After putting it in her freezer for an hour it was 72°F . How much did the freezer cool her soda down?
- 3) Sam read in his science book about a planet that was 73°F at night but during the day the temperature rose 120° . What temperature was the planet during the day?
- 4) When Victor went to the beach in the morning it was 60°F . When he came back later in the afternoon it was 76°F . What is the difference in temperature between the morning and afternoon?
- 5) The temperature at 7:00 PM was 77°F . By 11:00 PM it had cooled down 16° . What was the temperature at 11:00 PM?
- 6) A desert in Africa had an average temperature last year of 116°F . If the average temperature this year was 11° warmer, what is the average temperature this year?
- 7) Tiffany measured the temperature of her soda and found that it was 80°F . After putting it in her freezer for an hour it cooled off 24° . What temperature was the soda after an hour?
- 8) When Billy went to the beach in the afternoon it was 73°F . When he came back later that night it was 13° colder. What temperature was it at night?
- 9) A weather station predicted the temperature on Saturday would be 57°F . If the actual temperature was 14° warmer than their prediction, what temperature was it?
- 10) The temperature inside a freezer was 27°F . After the door was left open for an hour the temperature had risen 22° . What temperature was it after the door was left open?
